Professional Summary

Full-stack software engineer with hands-on experience building web applications, workflow automation systems, and API-driven platforms. Designed and deployed a logistics workflow platform that reduced manual workload by 70%. Skilled in React, Next.js, TypeScript, Node.js, MongoDB, REST APIs, cloud deployments, and AI-assisted development, with a focus on building reliable and scalable software.

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Material-UI, Bootstrap

Backend: Node.js, Express.js, REST API Development, JWT Authentication, OpenAI API Integration

Databases: MongoDB (Mongoose), MySQL

AI & Automation: OpenAI API, ChatGPT, Claude, GitHub Copilot, Cursor

Real-Time Technologies: Socket.IO, WebRTC

DevOps & Deployment: Docker, GitHub Actions (CI/CD), Vercel, Render, AWS (Foundational Knowledge)

Tools: Git, Postman, Jest, Agile/Scrum

Concepts: Data Structures & Algorithms, REST APIs, System Design Basics, Performance Optimisation, Debugging, Secure Coding Practices

Work Experience

Softlabs — Software Developer Intern — Sydney — Nov 2025 – Jan 2026

- Developed a WordPress plugin to replace manual email workflows with structured, database-driven request management.
- Built admin dashboards, file uploads, automated notifications, and request tracking features.
- Improved workflow efficiency and data organisation for non-technical users.
- Collaborated in an Agile team, contributing to feature delivery and iterative improvements.

Tech: PHP, WordPress APIs, MySQL

Xflyve Logistics — Full-Stack Developer (Part-Time) — Sydney — Oct 2024 – Aug 2025

- Designed and deployed a logistics workflow platform that reduced manual operational workload by 70%, improving job tracking and delivery workflows.
- Built a full-stack application using React, Node.js, Express.js, and MongoDB to replace spreadsheet-based workflows.
- Developed scalable REST APIs and implemented role-based authentication for admin and driver systems.
- Built features including job assignment, POD uploads, work diary management, and workflow tracking.
- Improved platform usability, performance, and reliability across frontend and backend systems.

Tech: React, Node.js, Express, MongoDB, JWT, Docker — [Demo](#) — [GitHub](#)

A Star Infotech — Web Developer — India — Jan 2022 – Oct 2023

- Developed responsive client websites using HTML, CSS, and JavaScript.
- Integrated frontend interfaces with backend services and MySQL databases.
- Maintained production systems, resolved issues, and improved performance.
- Collaborated with clients to translate business requirements into functional web solutions.

Tech: HTML, CSS, JavaScript, MySQL

Projects

TradeTrack — Full-Stack Trading Dashboard

- Built a full-stack trading dashboard for managing holdings, positions, orders, and portfolio analytics.
- Developed interactive dashboards and visualisations using React, Chart.js, and reusable UI components.
- Implemented secure authentication, REST APIs, and MongoDB Atlas integration for managing trading and portfolio data.

Tech: React, Node.js, Express.js, MongoDB Atlas, Chart.js, Material-UI — [Demo](#)

Education

Master of Information Technology

Asia Pacific International College, Australia (Completed 2026)

Bachelor of Technology (Computer Science)

Jodhpur National University, India (2019)
