Temporary Graduate Visa (Subclass 485) — Full-Time Work Rights in Australia

Professional Summary

Full-Stack Software Engineer with 2 years of commercial web development experience and a professional background in database administration. Experienced building responsive web applications using React, TypeScript, Node.js, Express, MongoDB, MySQL, and cloud deployment platforms. Delivered logistics automation software that reduced manual operational effort by approximately 70%, with a strong focus on building reliable software that solves real business problems.

Technical Skills

Languages: Java, JavaScript, TypeScript, PHP, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Vite, Tailwind CSS, Material UI, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO, OpenAI API Integration

Databases: MongoDB, Mongoose, MySQL, SQL Fundamentals, Backup & Recovery

AI & Automation: OpenAI API, ChatGPT, Claude, Cursor, GitHub Copilot, AI-assisted Development

Cloud & DevOps: Docker, GitHub Actions, Vercel, Render, AWS Fundamentals, Cloud Deployment

Testing & Tools: Git, GitHub, Postman, Jest, MySQL Workbench, Agile/Scrum

Professional Experience

Software Developer Intern — Softlabs — Sydney, Australia Nov 2025 – Jan 2026

- Developed a WordPress plugin that replaced manual email-based request processing with a structured workflow management system.
- Implemented MySQL-backed request management features to improve data organisation, retrieval, and workflow visibility.
- Built administrator dashboard features for managing requests, uploaded documents, workflow status, and internal records.
- Implemented file upload functionality and automated email notifications to streamline business communication.
- Contributed to feature implementation, defect resolution, and iterative product improvements within an Agile development team.
- Worked closely with team members to review requirements, test new functionality, and improve the overall user experience.

Tech Stack: PHP • WordPress APIs • MySQL • Git • Agile

Full-Stack Engineer — XFlyve Logistics — Sydney, Australia Oct 2024 – Aug 2025

- Developed a full-stack logistics management platform to digitise freight operations and replace spreadsheet, phone, and WhatsApp-based workflows.
- Built responsive React interfaces for administrators and drivers to manage jobs, POD records, work diaries, invoices, and reporting.
- Developed RESTful APIs using Node.js and Express.js to support job allocation, authentication, POD approvals, work diary management, and user administration.
- Implemented MongoDB data models for users, jobs, PODs, work diaries, work logs, invoices, and workflow management.
- Implemented JWT authentication and role-based access control to secure administrator and driver functionality.
- Integrated Cloudinary for secure image uploads, proof-of-delivery document storage, and file management.
- Containerised backend services using Docker and deployed production-ready frontend and backend applications using Vercel and Render.
- Collaborated with business users to gather requirements, refine workflows, and improve the platform based on operational feedback.
- Reduced manual operational workload by approximately 70% through automation of logistics workflows and centralised operational management.

Tech Stack: React • Node.js • Express.js • MongoDB • Docker — [Demo](#) — [GitHub](#)

Professional Experience

Web Developer — A Star Infotech — India

Jan 2022 – Oct 2023

- Developed responsive client websites using HTML, CSS, JavaScript, PHP, and MySQL.
- Integrated frontend interfaces with backend services and relational databases to deliver dynamic web functionality.
- Collaborated with designers and stakeholders to gather requirements and implement user-focused features.
- Maintained and enhanced production websites by fixing defects, improving usability, and implementing new functionality.
- Produced technical documentation and supported ongoing maintenance and scalability of client applications.

Tech Stack: HTML • CSS • JavaScript • PHP • MySQL

Associate Database Administrator — GS Global — India

Nov 2019 – Dec 2021

- Administered MySQL databases by managing user accounts, permissions, and role-based access.
- Performed scheduled database backup and recovery procedures to maintain data availability and integrity.
- Monitored database performance, analysed SQL queries, and optimised system parameters to improve query response times.
- Applied database maintenance, security updates, and routine health checks to support reliable database operations.
- Supported end users by documenting database procedures and assisting with data management activities.

Tech Stack: MySQL • MySQL Workbench • SQL • Backup & Recovery

Projects

TradeTrack — Full-Stack Trading Dashboard

- Built a full-stack trading dashboard for managing holdings, positions, simulated orders, and portfolio analytics.
- Developed responsive React dashboards with reusable UI components and interactive financial charts.
- Implemented REST APIs, authentication, and MongoDB data models to support trading and portfolio workflows.

Tech Stack: React • Node.js • MongoDB — [Demo](#) — [GitHub](#)

Wanderlust — Accommodation Booking Platform

- Built a full-stack accommodation booking platform with authentication, listing management, reviews, and booking workflows.
- Implemented CRUD operations for listings, users, bookings, and reviews using an MVC architecture.
- Integrated Cloudinary for image uploads and storage across property listings.

Tech Stack: Node.js • Express.js • MongoDB — [Demo](#) — [GitHub](#)

Meetify — Full-Stack Video Meeting Platform

- Built a real-time video meeting platform with authentication, meeting creation, and participant management.
- Implemented real-time communication using WebRTC and Socket.IO for video, audio, and live meeting events.
- Developed responsive React interfaces and backend APIs using Node.js and Express.js for meeting workflows.
- Built backend functionality for meeting session management, participant coordination, and real-time event handling.

Tech Stack: React • Node.js • WebRTC — [Demo](#) — [GitHub](#)

Portfolio Website — Developer Portfolio

- Developed a responsive Next.js portfolio website showcasing software projects, technical blogs, resume downloads, and professional experience.
- Built reusable frontend components using TypeScript, Tailwind CSS, and modern React architecture.
- Implemented SEO optimisation, downloadable resume functionality, blog pages, and an AI-powered chatbot using the OpenAI API.

Tech Stack: Next.js • TypeScript • Tailwind CSS — [Live Site](#)

Education

Master of Information Technology

Asia Pacific International College, Australia (Completed 2026)

Bachelor of Technology (Computer Science)

Jodhpur National University, India (2019)
