Professional Summary

Full-Stack Software Engineer with hands-on experience designing and building full-stack web applications and logistics automation software using the MERN stack. Experienced with React, Next.js, Typescript, Node.js, Express.js, MongoDB, MySQL, and modern DevOps practices.

Technical Skills

Languages: Java, JavaScript, TypeScript, PHP, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Vite, Tailwind CSS, Material-UI, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT/Passport.js Auth, Socket.IO, OpenAI API Integration

Databases: MongoDB, Mongoose, MySQL

Cloud & DevOps: Docker, GitHub Actions (CI/CD), AWS (EC2, S3, IAM), Vercel, Render

AI & Automation: ChatGPT, Claude, GitHub Copilot, Cursor

Tools: Git, GitHub, Jest, MySQL Workbench, Agile/Scrum

Work Experience

Xflyve Logistics — Fleet Operations (Part-time) — [Live Demo](#) — [GitHub](#) **Oct 2024 – Aug 2025**
Sydney, Australia

- Started in fleet operations handling job assignments and driver paperwork, then self-taught the MERN stack to build Xflyve, replacing manual spreadsheet/WhatsApp coordination with a role-based web app.
- Designed MongoDB schemas for jobs, drivers, trucks, and Proof-of-Delivery records, with role-based access separating admin and driver workflows.
- Built job-invoicing logic reflecting real fleet rules: jobs require an approved delivery proof (and, for interstate jobs, an approved compliance diary) before invoicing.
- Added Excel/ZIP export tools for admin reporting, applied rate limiting/Helmet/structured logging, load-tested with Artillery, and deployed via Docker + GitHub Actions CI/CD.

Softlabs — Software Engineer Intern **Nov 2025 – Jan 2026**
Sydney, Australia

- Developed custom WordPress plugins using PHP, MySQL, and WordPress APIs to automate internal workflows.
 - Collaborated in an Agile team on feature implementation, debugging, testing, and code reviews.
-

Projects

TradeTrack — Multi-App Trading Dashboard (MERN) [Live Demo](#)

- Built a Zerodha-inspired trading dashboard as three separate apps (landing site, auth-protected dashboard, Express API) with Passport.js login and Chart.js-driven Holdings/Positions/Orders views.

Meetify — Real-Time Video Meeting App [Live Demo](#)

- Built a video meeting app using WebRTC for peer-to-peer audio/video and Socket.IO for signaling, with user auth and meeting history on Node.js/Express/MongoDB.

Wanderlust — Airbnb-Style Booking App [GitHub](#)

- Built a full booking app (listings, reviews, image uploads, Mapbox maps) with session-based Passport.js login, Joi validation, and server-rendered EJS views on an MVC Node/Express/MongoDB backend.

Portfolio Site kapilyadav.dev

- Built a performance-focused developer portfolio with Next.js (App Router), TypeScript, and Tailwind CSS, featuring an MDX-powered blog, custom animations (Framer Motion), and a scroll progress indicator.
-

Education

Master of Information Technology **Completed 2026**
Asia Pacific International College, Australia

Bachelor of Technology (Computer Science) **2019**
Jodhpur National University, India
